POTS REPLACEMENT WITH AN EPIK BOX

Granite can provide you comprehensive coverage nationwide and on any mobile network with replacing out-of-date landlines with an EPIK device. Utilizing Verizon’s extensive 4G LTE network, the EPIK device deliver an analog signal and shifts from aging networks. Save money today and stabilize costs by taking advantage of a fixed cost and an all inclusive package.

COMPLETE SOLUTION

| | |
|--|---|
| <p>Life Safety Enables alarms and elevator phones to fully communicate , even if power or Internet goes down.</p> | <p>Disaster Avoidance Reliable, self-contained connections for a cost-effective “always up” alternative to copper</p> |
| <p>Faxing Reliably, send and receive faxes without the challenges. Complies with HIPPA regulations.</p> | <p>Business Continuity Enjoy robust 4G Internet failover as back-up for primary Internet connection. EPIK is 5G ready!</p> |

BENEFITS

- **Save Money:** Cost of landlines have tripled. Save up to 60% and stabilize costs.
- **Reliability:** Operates on Verizon’s reliable 4G network. Critical voice service stays up, even if Internet is down.
- **Versatility:** Complete solution that compliments every phone system. Handles fax, point of sale, voice lines, alarms, SCADA, and more!
